Exploring a Path from Competition to Association

The **Colours of Money** - 3 day seminar - looks at new ways of understanding the history and purpose of money and how it can be the main instrument for bringing about real and lasting change in our economic circumstances. Ranging from the problems of small businesses to larger questions of global finance and the power of corporations, it offers a radical yet concrete approach to money in our times.

Based in part on **Rudolf Steiner's** observations about modern economic life, it will be presented using coloured chalk imagery on black paper - *a technique intended to make economics less dismal!*

Dates: Friday 31st Oct 2pm - 6pm
Saturday 1st Nov 9.30am - 6pm
Sunday 2nd Nov 9.30am - 12.30pm
Cost: \$350

Money as the Veil of Karma

Christopher Houghton Budd PhD

To enter the economic realm, not here meaning only finances, is to enter upon the workings of karma and the eventual ordering of the karmic chaos of our times - that being a description of the great many problems that confront humanity today. To understand economics in this way is to enter directly into Rudolf Steiner's own work - the development of a modern knowledge of karma and reincarnation.

A public talk with ample time for discussion and questions.

Thursday 30th October 8pm

\$20
